PROFESSIONAL SUMMARY

Automation and AI Engineer with 5 years of experience building enterprise automation, cloud, and AI-driven solutions at Tata Consultancy Services. Specialized in intelligent automation, large-scale IT operations, and ML-enabled workflow optimization. Built a BERT-based ticket classification system processing 160K+ monthly transactions at 97% accuracy and led security compliance initiatives improving endpoint compliance across 800K+ devices. Recipient of the TCS Copyright Award 2025 for Enterprise RPA Platform innovation.

PROFESSIONAL EXPERIENCE

TATA CONSULTANCY SERVICES (TCS)

Senior RPA Developer & AI Engineer | 2022 - Present

- **Enterprise RPA 1.0 Platform (Copyright 2025):** Architected an end-to-end automation platform covering software deployment, O365 licensing, compliance monitoring, and testing. Delivered production-grade automation bots with 92% operational job success rate, reducing manual effort by 95% and saving 1000+ operational hours annually.
- Built **Agentic AI Proof-of-Concept (POC)** using **UiPath AI Center** for automated knowledge extraction from service desk databases, demonstrating feasibility for **self-healing ticket resolution**.
- Automated IT service workflows integrating Active Directory, and Azure-based systems to reduce manual ticket handling and operational turnaround time.
- **Team-Based Ticket Routing Automation:** Built a Python, Selenium, and SQL-based automation framework to route 5K+ daily tickets to roster-based support teams. Eliminated manual queue monitoring and assignment workflows for 200+ engineers, improving operational efficiency and ticket response turnaround time.
- **Office 365 License Assignment Automation:** Built workflow-driven automation for provisioning and revoking Office 365 licenses, eliminating manual allocation processes and improving enterprise license utilization, governance, and operational efficiency.
- Led phased migration of 5TB+ enterprise data workloads to Google Cloud Platform (BigQuery, Dataflow, Dataproc), completing the transition without major production disruption and reducing infrastructure costs.
- Improved endpoint compliance from 70% to 98% across 800K+ devices by designing a Smart Business Rules engine, directly reducing security audit findings.
- **Smart Ticket Classifier:** An ML-powered ticket and change-request classification platform using BERT (Bi-Encoder + Cross-Encoder), processing 160K+ monthly transactions at 97% classification accuracy. Automated catalog selection workflows and reduced average resolution time by 85%.
- **Network Bandwidth Eagle Eye:** Developed time-series forecasting models for network link optimization, saving INR 60 lakh in FY24 with projected savings of INR 2+ crore by FY26 through intelligent upgrade/downgrade recommendations.
- **Inventory As a Service:** Developed automated inventory intelligence workflows by integrating enterprise management and security platforms with AI-powered document extraction pipelines. Utilized Google Cloud Gemini APIs to process unstructured PDF data and generate normalized inventory records for operational analysis and compliance reporting.
- **Smart Security Compliance Drive:** Built an automated endpoint compliance framework to identify assets violating enterprise security policies, trigger notification and reminder workflows, and enforce governance controls for unresolved violations. Significantly improved organization-wide endpoint security compliance and reduced security audit findings.

IT Operations Lead & Asset Management | 2021 - 2022

- Managed IT operations for India North Region, overseeing asset lifecycle and vendor coordination.
- Identified and piloted 25+ automation opportunities, building the business case that led to the dedicated RPA practice.

HACKATHON WINS

- **1st Place - TCS AI Hackathon 2025:** Energy Optimizer for Oil & Gas Pipelines
- **2nd Place - TCS AI Hackathon 2025:** IoT AI Agent for Facility Energy

CERTIFICATIONS

UiPath Certified Automation Developer Associate & Professional | UiPath Agentic Automation Associate | Microsoft Power Automate RPA Developer Associate | Microsoft Azure Administrator (AZ-104) | Microsoft Azure Developer (AZ-204) | Google Cloud Associate Engineer

TECHNICAL SKILLS

Automation & RPA: UiPath Studio, Microsoft Power Automate, Selenium WebDriver

Orchestration: Rundeck, Cloud Composer, UiPath Orchestrator

Cloud & Data: Google Cloud Platform (BigQuery, Dataflow, Dataproc), Azure, SQL, ETL Pipelines, PySpark

Programming & Scripting: Python, PowerShell

AI & ML: BERT, Transformers, NLP, Generative AI, Time Series Forecasting

Enterprise Systems & Integration: REST APIs, Active Directory, SharePoint, Outlook

DevOps & Tools: Docker, Linux, Git, GitHub, GitLab, CI/CD

AWARDS & RECOGNITION

- Copyright Award 2025 – Enterprise RPA 1.0 Platform (intellectual property recognition by TCS)
- Best Performance Improvement Project – Unit Level (1,000+ employees), Sep 2024
- Received 30+ awards & 28+ appreciations for automation, innovation, and delivery excellence across enterprise operations

EDUCATION

Bachelor of Computer Applications (BCA) - Shri Ramswaroop Memorial University, 2021
