PROFESSIONAL SUMMARY

Automation and AI Engineer with 5 years of experience at Tata Consultancy Services, building enterprise-grade RPA, cloud, and ML-driven solutions. Architect of a BERT-based ticket classifier processing 160K+ monthly transactions at 97% accuracy and 1,000+ operational hours savings per month. Recognized with two TCS Copyright Awards (2024, 2025) for original intellectual property.

PROFESSIONAL EXPERIENCE

TATA CONSULTANCY SERVICES (TCS)

Senior RPA Developer & AI Engineer

July 2021 - Present

- **Enterprise RPA 1.0 Platform (Copyright 2025):** Architected an end-to-end automation platform covering O365 licensing, ITSM automation, and testing. Delivered production-grade automation bots with **92% operational job success rate**, reducing manual effort by **95%** and saving **1000+ operational hours** monthly.
- **Smart Ticket Classifier (Copyright 2024):** An ML-powered ticket and change-request classification platform using BERT (Bi-Encoder + Cross-Encoder), **processing 160K+ monthly transactions at 97% accuracy**. Automated catalog selection workflows and reduced average resolution time by **85%**.
- **Network Bandwidth Eagle Eye:** Developed time-series forecasting models for network link optimization, saving **INR 60 lakh in FY'24** with projected savings of **INR 2+ crore by FY'26** through intelligent upgrade/downgrade recommendations.
- **Ticket Routing Automation:** Built a Python, Selenium, and SQL-based automation framework to route **5000+ daily tickets** to roster-based support teams. Eliminated manual queue monitoring and assignment workflows for **200+ engineers**, improving operational efficiency and ticket response turnaround time.
- **On-Premises to Cloud Migration:** Led phased migration of **5TB+ enterprise data workloads** to Google Cloud Platform (BigQuery, Dataflow, Dataproc), completing the transition without major production disruption and reducing infrastructure costs.
- **Smart Security Compliance Drive:** Engineered an automated endpoint compliance framework to detect policy violations, trigger notification workflows, and enforce governance controls resulting in significant improvement in compliance across devices and reduced security audit findings.
- **Procurement & Software Inventory As a Service:** Integrated enterprise management and security platforms with AI-powered document extraction pipelines using **Google Cloud Gemini APIs** to process unstructured PDF data and generate normalized inventory records for compliance reporting.
- **Office 365 License Assignment Automation:** Built automation for provisioning and revoking Office 365 licenses, eliminating manual processes and improving enterprise license utilization, governance, and operational efficiency.
- Built **Agentic AI Proof-of-Concept (POC)** using **UiPath AI Center** for automated knowledge extraction from service desk databases, demonstrating feasibility for **self-healing ticket resolution**.

TECHNICAL SKILLS

Automation & RPA: UiPath Studio, Microsoft Power Automate, Selenium WebDriver

AI & ML: BERT, Transformers, NLP, Generative AI, Time Series Forecasting, RAG, Agentic AI (Gemini, GPT)

Cloud & Data: Google Cloud Platform (BigQuery, Dataflow, Dataproc), Azure, SQL, ETL Pipelines, PySpark

Orchestration: Rundeck, Cloud Composer, UiPath Orchestrator

Programming: Python, PowerShell

DevOps & Tools: Docker, Linux, Git, GitHub, GitLab, CI/CD

Enterprise Systems & Integration: REST APIs, Active Directory, SharePoint, Outlook

CERTIFICATIONS

UiPath - Automation Developer Associate, Automation Developer Professional, Agentic Automation Associate

Microsoft - Power Automate RPA Developer Associate, Azure Administrator (AZ-104), Azure Developer (AZ-204)

Google - Cloud Associate Engineer

AWARDS & RECOGNITION

- Copyright Award 2025 - Enterprise RPA 1.0 Platform (intellectual property recognition by TCS)
- Copyright Award 2024 - Smart Ticket Classifier (intellectual property recognition by TCS)
- Best Performance Improvement Project - Unit Level (1,000+ employees), Sep 2024
- Received 30+ awards & 28+ appreciations for automation, innovation, and delivery excellence across enterprise operations

HACKATHON WINS

- **1st Place - TCS AI Hackathon 2025:** Energy Optimizer for Oil & Gas Pipelines
- **2nd Place - TCS AI Hackathon 2025:** IoT AI Agent for Facility Energy Management

EDUCATION

Bachelor of Computer Applications (BCA) - Shri Ramswaroop Memorial University, 2018 - 2021
